Achieve a complete, up-to-date and complete integrated system that can be used in a variety of industries. BS1 Enterprise Accounting provide an opportunity for the user to quickly receive accurate data such as accounting figures for the company's income tax returns, earning reports for the company's annual report and payroll statistics, among others. The interface of the product is very simple and easy to use, with an interface design that is very clear and easy to understand. BS1 Enterprise Accounting is fully integrated with Slickpie Mr Accounting and Slickpie Manager. With this product, an enterprise's financial transactions will be published in a very simple and easy way, eliminating the need for a separate payroll, finance or accounting software. It will be possible to provide reports for the end user or corporate level and to publish the company's financial transactions. It also includes features such as export/import of data from other software packages such as HR, DB or VIVO, producing financial reports or payroll tax. Each user of the software will be able to see the payroll that is being done by other users of the system. Any data can be customized or be made according to the user's needs. The user can also add images to any document. The system will allow the user to generate reports such as invoices, payroll, sales, expenses, receiving transactions, among others. The system will be able to automatically create invoices based on any data provided by the user. The user will be able to control all financial transactions, as well as the data of the enterprise. It includes features such as importing/exporting data from other software packages such as HR, DB or VIVO. To date, the user has the option of exporting the database for backup or migration to a new server. This product can also be used as a time clock, so the user can authorize the employees' hours to the individual and the time they have worked, as well as the user's hours worked during the day. The user can create a payroll table, print a company's pay slip, print the user's pay slip, generate an invoice for any person, print the invoice or generate a paper check. The user will also be able to control the system's user interface through the administration console.
